

Münki - the plant-based snack food company is here to kick off a Tastebud Evolution! What does that mean? It means bringing innovative, globally-inspired flavors to our customers - all delivered with a "cheeky monkey" attitude. Based in Asheville, NC, Münki released an exciting new Superfood Granola line in 2019 (vegan, refined sugar & gluten free) that compliments the original Trailmix gang that started it all in 2015. What's next you ask? Gretchen (the chef) & Matthew (the greedy taste tester) can always be found in the kitchen experimenting with fresh ideas and are already working on the next snack that will evolve your tastebuds.
